

We have seen first-hand the high level of stress that dental teams endure when trying to treat challenging patients without sedation.

To allay some of those stresses, *Issaquah Valley Dental Care* is pleased to offer you our IV sedation services. We've undertaken extensive postgraduate training and are fully licensed to provide this option, so if you have patients who are apprehensive about the dental office, we invite you to phone us. Dr. Bashar employs the *Malamed Sedation Technique* while Dr. Dhankhar employs the *Jorgensen Sedation Technique*.

Dr. Ajay Dhankhar is a graduate of the prestigious *Loma Linda University* and recipient of its Academic Excellence Award. He is an associate faculty member at the *School of Dentistry, University of Washington*, and is active in the *American Dental Society of Anesthesiology*. He was awarded *Masters Certification in the College of Conscious Sedation*,

the highest standard in Sedation Dentistry. He is an *Associate Fellow of the World Clinical Institute* and is certified in *Advanced Cardiac Life Support* and *Pediatric Advanced Life Support*. He received his sedation license in 2005.

Dr. Rehan Bashar is also a graduate of the prestigious *Loma Linda University* in Southern California where he won the *Clinical Excellence Award* and was one of the few in the *Endodontic Honors Program*. Dr. Bashar has been practicing dentistry in Seattle since 2002, is certified in *Invisalign®* Orthodontics, and has completed his *Fellowship for the International Congress of Oral Implantologists*. He completed his sedation training at the *University of California at Los Angeles* and is fully licensed by the State of Washington.

Your patients' comfort is important to us...

When you send your most challenging and fearful patients to *Issaquah Valley Dental Care* for the treatment they need but you know they resist, you can be confident in their comfort. Our entire team takes great pride in the high quality of service and care we provide. Designed specifically with the anxious patient in mind, our conveniently located facility is large, spacious, and serene.

We are sure that your patients will find the office welcoming, comfortable, and relaxing with numerous amenities and leading edge, patient-friendly equipment. Our primary goal is to make each dental visit as enjoyable as possible while offering the same efficient, effective, quality dental care your patients have come to expect.

After treatment under IV sedation, your patients will return to your office, to receive your ongoing excellent care.

Our Promise To You...

Please accept our assurance that the combination of professional training, state-of-the-art equipment used to deliver sedation, and constant monitoring place your patient in the very best hands. In fact, at *Issaquah Valley Dental Care* our sedation protocols far exceed state guidelines for IV sedation.

Applying Malamed and Jorgensen polypharmacy technique as appropriate...

- Both Dr. Dhankhar and Dr. Bashar are present with each patient. One doctor monitors sedation while one does the dentistry, for safe and effective patient care.
- Continuous monitoring is aided by our Welch Allyn monitor and standard monitoring includes 3-ECG, NellcorR pulse oximetry (SPO2) and non-invasive blood pressure, temperature, respiration, end tidal CO2 and other vital signs for safe and predictable sedation outcomes. An Automated External Defibrillator is available.
- Dr. Dhankhar and Dr. Bashar are certified with ACLS and PALS and are licensed to provide Moderate Sedation with Parenteral Agents. They are members of the *Dental Organization for Conscious Sedation* and the *American Dental Society of Anesthesiology* and also have Masters Level Certification from the *College of Sedation in Dentistry*.

Some of your patients who may benefit from our services are those who:

- experience overwhelming avoidance anxiety
- have difficulty with local anesthetics
- have overactive gag reflexes
- experience claustrophobia
- have high blood pressure or take multiple medications
- require complex or extensive treatment that require consolidation including:
 - all phases of restorative and crown and bridge treatment
 - most surgical and prosthetic services for implants
 - periodontal surgical and nonsurgical treatment
 - non-surgical Endodontics including posterior teeth
 - oral surgery including wisdom teeth extractions
 - laser-assisted soft tissue procedures.

Please accept our gratitude for your trust and, in turn, our commitment to provide you with timely and excellent follow-up and comprehensive, meticulous reports, including before-and-after photos, x-rays, and detailed report of drugs used and vital signs during the procedure.
